## SOFTWARE ENGINEER

Innovative, bilingual, self-motivated, and goal-driven developer with progressive experience in software design and programming. Motivated to empower individuals through mentorship and change the world through exceptional digital experiences. Develop user interfaces, test code, troubleshooting complex issues, and engineer features in response to user needs. Fluent in English and French.

## CORE COMPETENCIES

HTML | CSS | JavaScript | Java | React | Redux | Node | Python | Django | SQL | Microsoft Office | Git | Command-Line | Github  
jQuery | PostgreSQL | MongoDB | Mongoose | NoSQL | Firebase | AWS | Web API | MERN | Express | ES6 | Mongo DB | SASS | LESS  
Software Development Lifecycle | Coding | Bug Fixing | Cross-Functional Collaboration | Testing | Regulatory Compliance  
Software Engineering | Accountability & Ownership | Computer Science | Distributed Systems | Programming | Web Applications

## HIGHLIGHTS

- Adept with new technological advancements, recognizing priority, formulating, and pioneering innovative solutions.
- Demonstrate a keen sense of technical aptitude to deliver high-quality and functional projects within budgets and schedules.
- Unmatched capacity to optimize web functionality, enhance workflow efficiencies & resolve performance issues.
- Expertise spanning customer service and project improvement with a record of achieving optimal results with thoughtful planning, organization, and a solutions-oriented approach to conflict resolution to drive growth and build relationships.
- Ability to work independently or collaboratively with diverse people, providing effective recommendations for innovation.

## RELEVANT PROJECTS

[Youtube Channel](#) | 364 Subscribers & Followers August 2021 - Present

- Create and launch a YouTube channel that provides lo-fi music to assist programmers and software engineers with coding and brainstorming.
- Guides and stimulates users to stay focused, calm, and motivated throughout their coding sessions.

[Minesweeper Project, Javascript, HTML/CSS](#) March 2022

- Built a fully functional, browser-based game called Minesweeper, which uses web development, DOM manipulation, and responsive design which allows users to play the game on iOS and android devices.
- This game also implements and win or lose interpretation, and achieves phenomenal, software design.

[Unit Converter Website Project, Java](#) February 2022

- Designed a website that allows users to convert between one type of unit to another by creating an image slider utilizing advanced javascript techniques. A dynamic and scalable software solution targeted at offering high-quality solutions.

[Image Slider Project, HTML, CSS and Javascript](#) December 2021

- Created a photo slider perfect for desktop and mobile applications using techniques such as Responsive Design in javascript.
- Involves the use of creative solutions and continuous integration.

## PROFESSIONAL EXPERIENCE

**PATIENT CARE TECHNICIAN | George Washington University Hospital | Washington, D.C.** May 2019 – March 2022

- Analyzed patient documentation and achieved 100% data accuracy by interpreting health data using Cerner software.
- Collaborated on teams through rapid responses and emergencies in the hospital's stroke unit.
- Attended, consolidated, and assessed patients' needs and offered support to optimize treatment planning and care delivery.

## VOLUNTEER EXPERIENCE

**MENTOR | Women Who Code | Remote** August 2021 – Present

- Educate and guide young women on coding and embracing gender diversity in the technology industry.
- Establish relationships and provide inspiration and motivation to empower more women to pursue careers in technology.

## EDUCATION & PROFESSIONAL DEVELOPMENT

**Software Engineering Immersive | Adobe Digital Academy Scholar | General Assembly | Remote** May 2022

**Web Development Course | Treehouse | Remote** February 2022

**Bachelor of Arts in Health Services, Dean's List | Trinity Washington University | Washington, DC** May 2018
